

Buddha Import

An introduction to the Asian engineers importation

December 2011

What are we doing Our company have been specialised in the importation of Asians software engineers for more than ten years. Our imported engineers are able to complete complex tasks, like building amazing Java management applications from scratch, with less than the fourth of the price of an European engineer (we don't know why they are called "engineer" because you don't need to be an engineer to develop Java applications).

Personal details We are 3 employees from our Ukrainian offices, near Prypiat. All of us are looking for new societies that may need our services.

Personnel In ten years, our company have grown to around one hundred workers. We have plans to provide temporary workers to increase our benefits.

Products and services We offer a large range of competences, from Java computer scientist to Oracle administrator.

We are in contact with top Indian and Chinese universities to keep a competitive level. Our new temporary workers service will be able to give working force to our customers without the price of a full time employment.

Market Buddha Import is the largest European company specialised in engineers importation and our prices are the lowest of this market. In two words, we are pioneer and leaders !

Marketing We have a lot of consultants to help our clients to find exactly what they need and giving them advices. We are able to calculate precise estimations of costs reduction to our customers, which is a huge advantage in customers relationships.

Premises and logistics Buddha Import's siege is located in Ukraine but we also have a subsidiary in Bruxelles. We have our own planes for importations and we plan to buy two new Airbus A380, so we will be able to import four hundreds engineers per day.
